About me

My adventure with the front-end began with web design in Figma. Over time, I started experimenting with HTML and CSS. Before I knew it, I had written my first interactive applications in JavaScript. Satisfaction with my working code gave me the motivation to learn more and more advanced technologies and frameworks. I'm learning the good practices of Angular, using types, classes and interfaces in TypeScript and TDD. I can communicate effectively in a team and use Git. I am open to new challenges.

Experience

Front-end developer in Novaris
Warsaw

📅 *since 09/2022*

Angular | TypeScript | RxJs | NgrX | Jasmine | HTML

Commercial site for design company
Usługi projektowe Mirosław Izdebski

Weather app in React
Weather app

Lisp App in React
Lisp App

More of my projects such as **CodeQuiz** and **Product landing page** can be found on my Github. The projects were previously designed by me in **Figma**, and the graphics were mostly created in the **Affinity suite**.

My stack

Angular	TypeScript	React	JavaScript	RxJs	NgRx

Sass/Scss	HTML5	CSS3	Git	Figma	Affinity Suite	VSCode

Education

WIT Wyższa Szkoła Informatyki Stosowanej i Zarządzania w Warszawie - *Web design*

2019
